

Surgical Resection for Brain Tumors and Metastases

Surgery is a fundamental part of treatment for brain tumors and brain metastases. Some of the questions we will answer are: What are the benefits of brain surgery for brain tumors and metastatic lesions? What surgical procedures are available to treat brain tumors and metastases? Are all brain tumors the same and do they require the same treatment?

Join us for an informative evening with Dr. Mateo Ziu, Neurosurgeon, Medical Director Surgical Neuro-Oncology, Inova Health System.

Wednesday, January 23, 2019

6:30-8PM

Life with Cancer Family Center

8411 Pennell Street, Fairfax, VA

Community support makes it possible for Life with Cancer to offer classes and groups at no cost to individuals impacted by cancer. Space is limited and advance registration is required at www.lifewithcancer.org or by calling 703.698.2526
